

附表一

 The image shows the First Class Atomic Energy Award medal. It features a large, multi-pointed star-shaped medal with a blue center containing a white atomic symbol, surrounded by red and white segments. Above the star is a small circular medallion with a green background and three white flowers. The medal is suspended from a ribbon with vertical stripes of red, white, and blue. To the right of the main medal is a smaller version of the same star-shaped medal.	 The image shows the Second Class Atomic Energy Award medal. It features a large, multi-pointed star-shaped medal with a blue center containing a white atomic symbol, surrounded by red and white segments. Above the star is a small circular medallion with a green background and three white flowers. The medal is suspended from a ribbon with vertical stripes of red, white, and blue. To the right of the main medal is a smaller version of the same star-shaped medal.	 The image shows the Third Class Atomic Energy Award medal. It features a large, multi-pointed star-shaped medal with a blue center containing a white atomic symbol, surrounded by red and white segments. Above the star is a small circular medallion with a green background and three white flowers. The medal is suspended from a ribbon with vertical stripes of red, white, and blue.
